📍 Avalon palace, pushpvihar soc., lunsikui
navasri

PROFILE

Software Developer and MCA student focused on building innovative technology products rather than academic-only projects. Experienced in developing AI-powered learning platforms, intelligent recommendation systems, misinformation detection applications, and personal analytics tools using modern development stacks. Strong foundation in Java, DSA, OOP, DBMS, Web Development, and Mobile Development with a continuous drive to learn, solve complex problems, and create software that delivers measurable real-world value.

WORK EXPERIENCE

2025–PRESENT Currently seeking entry-level opportunities. Have gained practical, hands-on development experience through real-world academic and personal projects. Actively working on improving full stack development skills through independent and academic projects, code documentation, and version control practices.

(Fluent)

PROJECT SECTION

HumanOS

Angular | Node.js | TypeScript | MongoDB

An AI-powered personal analytics platform that tracks focus, productivity, mental energy, habits, and goal progress through real-time dashboards, behavioral insights, and an interactive Future Self assistant for self-improvement and decision-making.

Shaelix

MERN Stack | React.js | Node.js | MongoDB | OpenRouter API

An AI-powered learning assistant that transforms educational videos into structured notes, key concepts, quizzes, timelines, mind maps, and interactive chat experiences, helping students learn faster and retain information more effectively.

Smart Device Explorer

Django | Python | JavaScript | SQLite

An intelligent device recommendation platform that helps users discover and compare smartphones and laptops based on budget, performance requirements, and personal preferences using AI-driven recommendation logic and real-time device data.
